EXAM DESCRIPTION

Hitachi Vantara Qualified Professional
VSP Midrange Family Installation
HQT-4180 Exam

Exam Type
Qualification

Format
Proctored, closed book exam

Credential
Hitachi Vantara Qualified Professional – VSP Midrange Family Installation

Validity 3 years

Delivery
Kryterion Webassessor System*

Questions 35

Passing Score 65%

Duration 60 minutes

Cost
US $100 or equivalent in local currency (plus local tax, depending on location)

Supporting Material
• 1024PI Installing and Configuring Hitachi VSP Midrange (4d ILT)

OR

(continued on the next page)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) midrange storage systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring, and supporting Hitachi midrange storage systems at customer sites. This includes strong knowledge of the system hardware and a thorough understanding of installation and configuration procedures. The test also covers basic storage management activities and the tools, techniques and best practices related to supporting and servicing the Hitachi VSP midrange family.

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP midrange storage installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of Hitachi midrange storage solutions implementation. They perform pre-installation checks and install, configure, and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1	**System architecture**
1.1	Describe the different VSP midrange storage systems models and their specifications.
1.2	Describe the VSP midrange storage systems architecture, internal components, and their functions.
Section 2	**Back-end architecture**
2.1	Describe the back-end architecture of VSP midrange storage systems.
2.2	Describe the back-end hardware components of VSP midrange storage systems.
2.3	Describe the VSP midrange storage systems drive sparing technology and concepts.
Section 3	**System installation**
3.1	Identify the VSP midrange storage systems documentation.
3.2	Describe the "New Installation" procedure for VSP midrange storage systems and when it is appropriate to use.
3.3	Describe the installation and initial configuration procedures for VSP midrange storage systems.
3.4	Describe how program products are enabled on VSP midrange storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

•1037PI VSP E Series Refresher Workshop for Certified Partners: What's New (1d ILT) **AND**
•1067PC What's New in the Hitachi VSP E Series: New VSP E1090, and Updates to VSP E790 and E590 (1h online)

The **Hitachi Vantara Learning Center** provides easy access to our instructor-led, online and downloadable training and exams, as well as full support for Hitachi Vantara certified professionals and other qualification programs.

Section 4	System maintenance
4.1	Identify the tools provided by Hitachi Vantara to install, configure and service VSP midrange storage systems.
4.2	Describe the parts-replacement procedures on VSP midrange storage systems.
4.3	Describe problem-determination and incident-resolution tools and techniques used when troubleshooting VSP midrange storage systems.
Section 5	**Configuration changes**
5.1	Describe how to perform online hardware upgrades and configuration changes on VSP midrange storage systems.
5.2	Describe the System Option Mode (SOM) concepts.
Section 6	**Firmware upgrades**
6.1	Describe how to perform firmware updates on VSP midrange storage systems.
Section 7	**Remote monitoring**
7.1	Identify the Hitachi remote monitoring tools for VSP Midrange storage systems.
Section 8	**Storage Provisioning**
8.1	Identify the management tools of VSP midrange storage systems, describe their function and how to use them.
8.2	Describe storage provisioning principles and techniques for VSP midrange storage systems.
8.3	Describe port security concepts and how storage is presented to hosts on VSP midrange-storage systems.

Digital Badges
Achieve your goals in an ever-expanding online marketplace easily with digital badges by sharing your credentials on LinkedIn and other social media.

After earning this credential, you will receive the
