Hitachi Data Systems Architect Performance and Virtualization (vILT) (Course #TXE1680)

This seven hour virtual instructor-led training course helps prepare the Hitachi Data Systems Certified Professional to take the Architect - Performance and Virtualization Exam (HHO-440). It builds upon the practical working knowledge of storage professionals who have implemented Hitachi performance and virtualization solutions. In addition it refreshes existing knowledge of performance and virtualization architecture concepts.

The course covers performance concepts and tools, design principles, storage-related equipment and applications, I/O concepts, storage configurations, and assessment, planning, and design of storage solutions.

[Visit the Hitachi Data Systems Learning Center](#) for more information or to register for this course.

See what Hitachi Data Systems partners and customers are saying about the certification program!

Being certified is a great way to bring credibility to my skill level, as well as confirm my expertise and knowledge in the storage areas of technology. *G Rajeshkumar*
