

# Hitachi Data Systems Certification

**HITACHI**  
Inspire the Next

What matters gets measured...what's measured, gets done! Hitachi Data Systems Certification, your road to achievement!

## Certification News and Updates - September 2009

### In this Issue:

- Certification Magazine 2009 Certification Survey
- Course Highlight: Hitachi Data Systems Enterprise Performance and Virtualization (vILT) (Course: TSE1870)
- See what Hitachi Data Systems partners are saying about the certification program!

### Certification Magazine 2009 Certification Survey

We have a great opportunity to advance and promote the Hitachi Data Systems Certification program and enhance your credentials in the marketplace.

We are working with MediaTec Publishing, publishers of Certification Magazine, and several industry partners to prepare an in-depth salary survey to gauge the financial impact of certification and experience on IT professionals.

### [Click here to participate in the survey.](#)

The questionnaire **must be completed prior to Sept. 25, 2009.**

Your input will be important as we work to accurately track IT salaries; your confidential response will be compiled and the aggregate results reported in the December 2009 issue of Certification Magazine. All IT professionals who complete the survey will be entered automatically into a drawing for American Express gift certificates awarded by MediaTec Publishing

Last year the HDS Certified Professional credential made the survey results for the first time.

Thank you very much in advance for your support.

### Hitachi Data Systems Enterprise Performance and Virtualization (vILT) (Course #TSE1870)

This five session (four hours each) virtual instructor-led course provides detailed information on how to configure software utilities on the Hitachi Universal Storage Platform™ V and Hitachi Universal Storage Platform VM. It familiarizes the learner with the technology and terminology of Hitachi performance and virtualization and the key supporting software utilities such as Hitachi Performance Manager Software, Hitachi Dynamic Link Manager software, Hitachi Universal Volume Manager software, Hitachi Virtual Partition Manager software, Hitachi Dynamic Provisioning software, and Hitachi ShadowImage® Heterogeneous Replication software.

The learner will complete numerous hands-on lab activities designed to build the skills necessary to install and operated the key software utilities presented during the course. It provides an opportunity to work with UNIX and Microsoft® Windows® systems integrated with Hitachi Universal Storage Platform™ V and Hitachi Universal Storage Platform™ VM.

This course is part of a two part training package. The package consists of this course, TSE1870 and TSE1869 - Hitachi Data Systems Enterprise Resource Manager Fundamentals. We recommend for the best learning opportunity both courses should be taken, TSE1869 first and then TSE1870. This virtual instructor-led package is identical to the instructor led (ILT) course TS11315 Hitachi Enterprise Software Solutions. You have the

option of taking either the vILT or ILT, but you should not take both.

[Visit the Hitachi Data Systems Learning Center](#) for more information or to register for this course.

**See what Hitachi Data Systems partners and customers are saying about the certification program!**

My primary rationale for obtaining Hitachi Data Systems certification is for the knowledge that I gain from the class. Secondly, the certification can be valuable to have on a resume. It shows the employer that one has made an extra effort to prepare for the certification exams.
