HITACHI
Inspire the Next

What matters gets measured...what's measured, gets done! Hitachi Data Systems Certification, your road to achievement!

Certification News and Updates - June 2010

In this Issue:

- New Course! Architecting Storage Performance with Hitachi Storage (Course TSI1945)
- See what Hitachi Data Systems partners are saying about the certification program!

New Course! Architecting Storage Performance with Hitachi Storage (Course TSI1945)

Research has shown over and over again that customers want to maximize their enterprise environments by improving performance. This new course will help satisfy this need. We have leveraged Hitachi field professionals who are experts in the area of performance to build both this course and the accompanying certification exam.

This four-day instructor-led course covers performance concepts and tools, design principles, storage-related equipment and applications, I/O concepts, storage configurations, assessment, planning, and design of storage solutions. This course includes case studies which will allow learners to diagnose performance issues and provide viable solutions.

January 17-20, 2011: Santa Clara, California
May 16-19, 2011: Hanover, Maryland

See what Hitachi Data Systems partners and customers are saying about the certification program!

My reasons to get my HCP, HCI and HCA certifications were mostly business related. By getting certified my company achieved another level of partnership with HDS, which helped to leverage business opportunities. At the same time, it helped me to gain confidence in myself and trust from my colleagues. Even when I've been in the business for more than 10 years, credentials are important to gain trust from people that don't know your professional

quality.

Sebastian Senen-Gonzalez

*Hitachi Data Systems Certified Professional , Hitachi Data Systems Certified Implementer and Hitachi Data Systems Certified Architect
ESI Technologies*
