## Certification

**HITACHI**  
Inspire the Next

What matters gets measured...what's measured, gets done! Hitachi Data Systems Certification, your road to achievement!

### Certification News and Updates - June 2009

#### In this Issue:

- New course! Hitachi Data Systems Architect - Performance and Virtualization
- See what Hitachi Data Systems partners are saying about the certification program!

#### New Course from the Hitachi Data Systems Academy

Hitachi Data Systems Architect – Performance and Virtualization (TXE1680)

Maximize your enterprise environment! This seven hour virtual instructor-led training course (split into two sessions over two days) for Hitachi Data Systems employees, Hitachi Channel Partners and customers covers performance concepts and tools, design principles, storage-related equipment and applications, I/O concepts, storage configurations, and assessment, planning, and design of storage solutions.

It has several interactive and collaborative exercises, and one Performance Monitoring paper lab, where the students are divided into teams in their own virtual breakout rooms.

It builds upon the practical working knowledge of storage professionals who have implemented Hitachi performance and virtualization solutions. In addition, it refreshes existing knowledge of performance and virtualization architecture concepts. It also helps you prepare for the Hitachi Data Systems Certified Architect - Performance and Virtualization Exam (HH0-440).

Search the [Learning Center](#) by course code or title for dates and upcoming sessions or send an email to [hds certifications@hds.com](mailto:hds certifications@hds.com) if you want more information.

**See what Hitachi Data Systems partners and customers are saying about the certification program!**

Earning HDS certification proves that I've understood the material from courses and how the systems work. It shows my company that time/money spent on courses isn't wasted, that I can demonstrate to them the knowledge I have gained. It increases my confidence in my own knowledge.

*John Piihl Mortensen  
Hitachi Data Systems  
Certified Professional and Hitachi Data Systems Storage Manager  
Storage Manager, JN Data A/S Denmark*

I'm a dedicated engineer for one of the biggest HDS customers in Russia - Vimpelcom. As our company not only supports Vimpelcom's storage needs but outsources its administration, we have a lot of different challenges in accuracy, timeliness, reliability and so on. So we need high qualified engineers at this site and we can prove our qualifications through our HDS Certifications. Three engineers in our dedicated group (including me) are HDS Certified Implementers. Also I'm planning to pass further exams. We are investing our time in the HDS certifications because it helps to prove to customers and ourselves that we know how to do our job, and do it with the highest quality as it can be.
