Region Nordjylland (North Denmark Region)

Danish administrative body faced exponential data growth across the 11 hospital sites it manages. It required a storage solution that would meet the highest demands of its complex critical hospital systems.

“...could be risking the difference between life and death. The high-performance capabilities, 24/7 support and 100% availability offered by Hitachi Data Systems is a service that is unmatched by other solution providers.”

Tom Hansen
Region Nord Infrastructure Team

CHALLENGE

- Complex IT infrastructure across 11 hospitals
- Need for quick data retrieval from X-rays
- Rising administrative costs
- 1000TB of unstored data
- Delays could mean the difference between life and death.

RESULTS

- Consolidation of all data
- 100% availability and real-time monitoring
- Reduced power and environmental impact
- Reduced management administration costs
- Reduced backup time by 50%

SOLUTION DEPLOYED

- Hitachi High Availability Manager
- Hitachi Virtual Storage Platform
- Hitachi Accelerated Flash
- Hitachi NAS Platform
- Hitachi Dynamic Provisioning
- Hitachi Dynamic Tiering
- Hitachi Content Platform
