SAARLAND UNIVERSITY HOSPITAL MANAGES DATA GROWTH COST-EFFECTIVELY

Universitätsklinikum des Saarlandes (UKS) (Saarland University Hospital)

German university hospital facing exponential data growth across a range of critical healthcare applications required significant additional storage capacity that was reliable and cost-efficient.

**CHALLENGE**
- Complex IT infrastructure
- Increasing data volumes – more than 20TB per annum
- Life-saving applications ranging from organ donor database to diagnostic imaging systems needed during surgery

**RESULTS**
- 100TB of additional storage capacity
- High availability
- Cost-efficient capacity
- Flexibility to make storage available at short notice
- Significant cost savings
- +100TB

**SOLUTION DEPLOYED**
- NAS Platform 3080
- Adaptable Modular Storage 2500
- TrueCopy

The collaboration with HDS progressed very smoothly. This was the case for the entire project, including training, support and price continuity. Hitachi NAS Platform (HNAS) 3080 meets our expectations for high standards of product quality.
