

Partner with Hitachi Data Systems for your storage system migration and discover greater efficiencies with single-sourced Multivendor Support for HDS and non-HDS systems.

Preferred Customer Services From Hitachi Data Systems: Multivendor Support

Converged Support in Today's Fast-Paced Digital Environment

At Hitachi Data Systems, we anticipate the challenges you face in today's dynamic, fast-changing era of digital transformation and we are prepared to help you continually succeed with end-to-end, converged support.

Preferred Customer Services from Hitachi Data Systems is a tiered portfolio of value-added, personalized support offerings designed to complement your existing Premium, Standard or Weekday Basic support service plan.

Centralized, Best-in-Industry Support

If your storage system has reached manufacturer end-of-support-life and you need more time for system migration, Hitachi Data Systems (HDS) has the solution.

Multivendor Support provides outstanding, post-warranty support to ensure that your end-of-support-life storage devices continue to operate in peak condition.

As the single source of support, Multivendor Support allows you to focus on the growth of your business as we strive to improve operational efficiencies for your HDS and third-party systems.

The Value of Multivendor Support

Centralized: With Multivendor Support, you streamline your operations and gain greater efficiencies as one single source of support helps ease the migration process.

Reliable: Hitachi Data Systems global support consultants provide unparalleled technical guidance and offer the protection, consistency and confidence you need to meet your business continuity requirements.

Comprehensive: We provide exceptional support and expert guidance to ensure a successful migration to your new solution. Our global support consultants walk you through the entire end-to-end process and proactively address challenges.

Terms and Conditions

Multivendor Support from Hitachi Data Systems is subject to these conditions:

- This option is available to all HDS customers, even if you do not transition to an HDS system, but simply want Hitachi Data Systems to provide support for your non-HDS system that has reached its end-of-life.
- HDS global support consultants provide hardware maintenance support, parts replacement and software support. Microcode updates and upgrades are not included.
- Offering includes systems decommissioning, whereby advanced eradication tools, detailed reporting and certificates of eradication are provided.
- We support a number of systems and models from a variety of storage providers such as EMC, NetApp and Cisco. Contact your local customer service and support manager to view the complete list of models.

“Support from HDS Switzerland was excellent. We have a great relationship with the local team and they provided us with extra on-site support during the migration. Together, we were able to complete the migration within eight months, an impressive timeline considering that we could only migrate data during short weekend maintenance windows.”

– Peter Wielath, Head of Core Platforms, Bank Vontobel

When You Succeed, We Succeed.
