

Hitachi Storage Adapter for Oracle WebCenter (OWC) is an end-to-end solution that simplifies data life-cycle management for on-site and cloud-based content throughout Hitachi Content Platform (HCP). This solution enables organizations to retain, access, repurpose and dispose of data as needed.

DATASHEET

Hitachi Storage Adapter for Oracle WebCenter

Turn Unstructured Content Into Assets Within Your Oracle Infrastructure

Life-cycle management for your valuable database and application-generated data assets is getting more complex and more costly as data volume and variety increase. IT organizations face evermore challenging demands to ingest, transcode, transmit, and store data on multiple media platforms.

Furthermore, rapidly growing repositories of structured, semi-structured and unstructured, and newer content types like videos, Web pages, and social media messaging demand more and more from your storage infrastructure. And throughout this cycle, your administrators must make quick decisions about the content they've collected and what is required for production, archiving or disposal.

Throughout the data life cycle, these valuable files touch multiple applications within your ecosystem. The size and volume of those files, along with the metadata tags required to track them, can challenge an IT infrastructure. IT can be negatively impacted if it is unequipped to effectively manage the load while simultaneously maintaining an efficient production workflow.

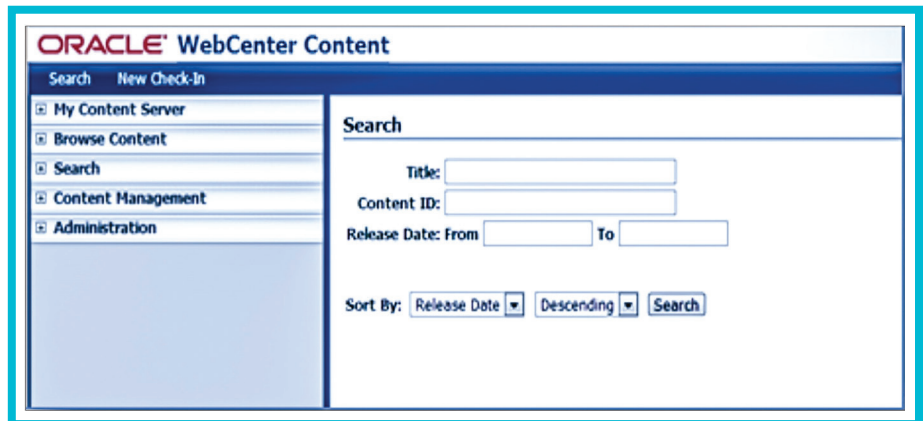

Figure 1. Oracle WebCenter serves as the front-end interface for the solution while Hitachi Content Platform seamlessly manages life-cycle management services.

Realize the Power of Hitachi Content Platform

Hitachi Storage Adapter for Oracle WebCenter is an open platform with comprehensive, but simple to use services. By consolidating unstructured and structured content from a variety of Web-ready formats, it enables your entire data repository to be centrally managed within Hitachi Content Platform (HCP). The solution enables end users, administrators and other stakeholders to gain insight into content within desktop productivity tools, business applications and mobile devices (see Figure 1).

Hitachi Storage Adapter for Oracle WebCenter:

- Streamlines and simplifies data life-cycle management for on-site and cloud-based content.
- Provides a simple, yet deep interface that serves a variety of user types.
- Offers comprehensive, rules-based services to manage compliance, retention and disposition requirements.

Effectively Manage Content to Support Business Processes

Hitachi Storage Adapter for Oracle WebCenter provides an innovative, yet simple, end-to-end solution for content management. The solution offers an enriched experience for administrators managing on-site and cloud-based data as they use Hitachi Content Platform as a centralized data repository.

Oracle WebCenter (OWC) serves as the front-end interface for the solution while HCP seamlessly manages life-cycle management services, such as archival, reducing space for ongoing backup jobs, file retention and disposition, and other content management functions. OWC enables comprehensive search services across the entire repository in just three simple steps.

OWC converts over 500 file formats to Web-ready formats such as HTML, XML, GIF and PDF, and can serve content via websites, desktops, really simple syndication (RSS) feeds, mobile devices, and Web services.

Hitachi Storage Adapter for Oracle WebCenter enables a number of content management operations, including:

- Add new content
- Find existing content
- Update content
- Revise content
- Delete content

Software Requirements

- Oracle JDK 1.7
- WebLogic WebCenter Server (WLS) 10.3.6
- Oracle WebCenter Content 11.1.1.8.0, Oracle WebCenter Content 11.1.1.9.0
- Hitachi Content Platform v6.1.1, Hitachi Content Platform v7.0.1 or Hitachi Content Platform v7.1.1

EFFICIENTLY MANAGE CONTENT TO SUPPORT BUSINESS PROCESSES AND GAIN VALUE FROM ARCHIVES

Hitachi Storage Adapter for Oracle WebCenter:

- Transforms content archives into a business asset by enabling simple, consistent and automated life-cycle management.
- Enables centralized and consistent content management for your organization.
- Streamlines ingest, search, retention and disposition services.
- Delivers content via desktop productive tools, business tools and mobile applications to provide greater insight; makes it accessible for an organization in preferred.
- Converts more than 500 formats, including HTML, XML, GIF and PDF, to Web-ready content.

Operating System Requirements

- Microsoft® Windows® 2008 R2
- Red Hat Linux (RHEL) 6.3, 64-bit version only
- Red Hat Enterprise Linux (RHEL) 6.5, 6.6
- Oracle Enterprise Linux 6.5, 6.6

Manage the content life cycle with an open platform featuring extensive services that make business processes content-enabled.

Solutions for Oracle Databases

With over 20 years of Oracle expertise, Hitachi Data Systems has solutions, services, tools and expert knowledge to support the largest and most demanding Oracle customers worldwide.

Hitachi Data Systems solutions reduce the overall costs to support your Oracle infrastructure without compromise. Our solutions for Oracle deliver improved efficiency and centralized management.

They offer a rich feature set in a highly available environment that can easily meet service-level expectations for Oracle environments. Hitachi solutions help avoid both scheduled and unscheduled downtime, and ensure that Oracle environments can scale quickly and easily to accommodate rapid business growth.

Services to Help You Succeed

Hitachi Data Systems Global Services offers experienced Oracle database solution consultants, proven methodologies and a comprehensive services portfolio to assist you in implementing Hitachi products and solutions in your environment. For more information, visit www.hds.com/services.
