

On the Road With Hitachi Virtual Storage Platforms

Midrange storage with enterprise style.

Best-in-Class Capabilities – From Enterprise to Midrange. Advanced capabilities for every size business from the leader in storage design.

3

Reasons to choose VSP.

VSP family midrange storage systems lay the foundation for software-defined infrastructure and enable agility to respond quickly to shifting demands.

#1

More Performance.

- Flash-optimized 1.4 million IOPS.
- Sub-millisecond response time.
- Automated active flash.

#2

More Efficiency.

- External storage virtualization.
- Automate common management tasks.
- Nondisruptive data migration.

#3

More Reliability.

- Active-active high availability.
- 100% data availability guarantee.
- Worldwide service and support.

Hitachi: The Foundation for High-End Storage Systems

- #1 rated high-end storage systems.
- Most 3rd-party arrays supported.
- More than 26K virtualizing systems shipped.

With VSP you can:

- Run your applications at peak performance.
- Simplify and increase your overall efficiency.
- Eliminate risks to your success.

Hitachi VSP Midrange Family Systems

Hitachi VSP offers best-in-class performance, greater IT efficiency, lower risk and far less complexity – no matter what challenges the future presents to your business.
